

Rosemont Hills Montessori College

Web-Based Learning Resource Hub

Presented by: Group 1 BSIT-3B

Background of the Study

- Learning materials are scattered across different platforms.
- Students have difficulty finding resources.
- Teachers repeatedly upload or resend files.
- There is no centralized repository.
- Monitoring resource usage is difficult.

Statement of the Problem

- No centralized repository
- Files are difficult to locate
- Learning resources become buried in chats
- Students cannot easily review previous lessons
- Incoming students have limited access to study materials

Proposed Solution

- Develop a Web-Based Learning Resource Hub where teachers upload faculty-approved learning materials and students can search, view, and download them anytime.

Objectives

General Objectives

Develop a web-based platform for managing and accessing learning resources.

Specific Objectives

- Provide secure login.
- Allow teachers to upload files.
- Allow students to search and download resources.
- Organize files by subject.
- Generate reports.

Target Users

Administrator

- Manage users
- Manage subjects
- Generate reports

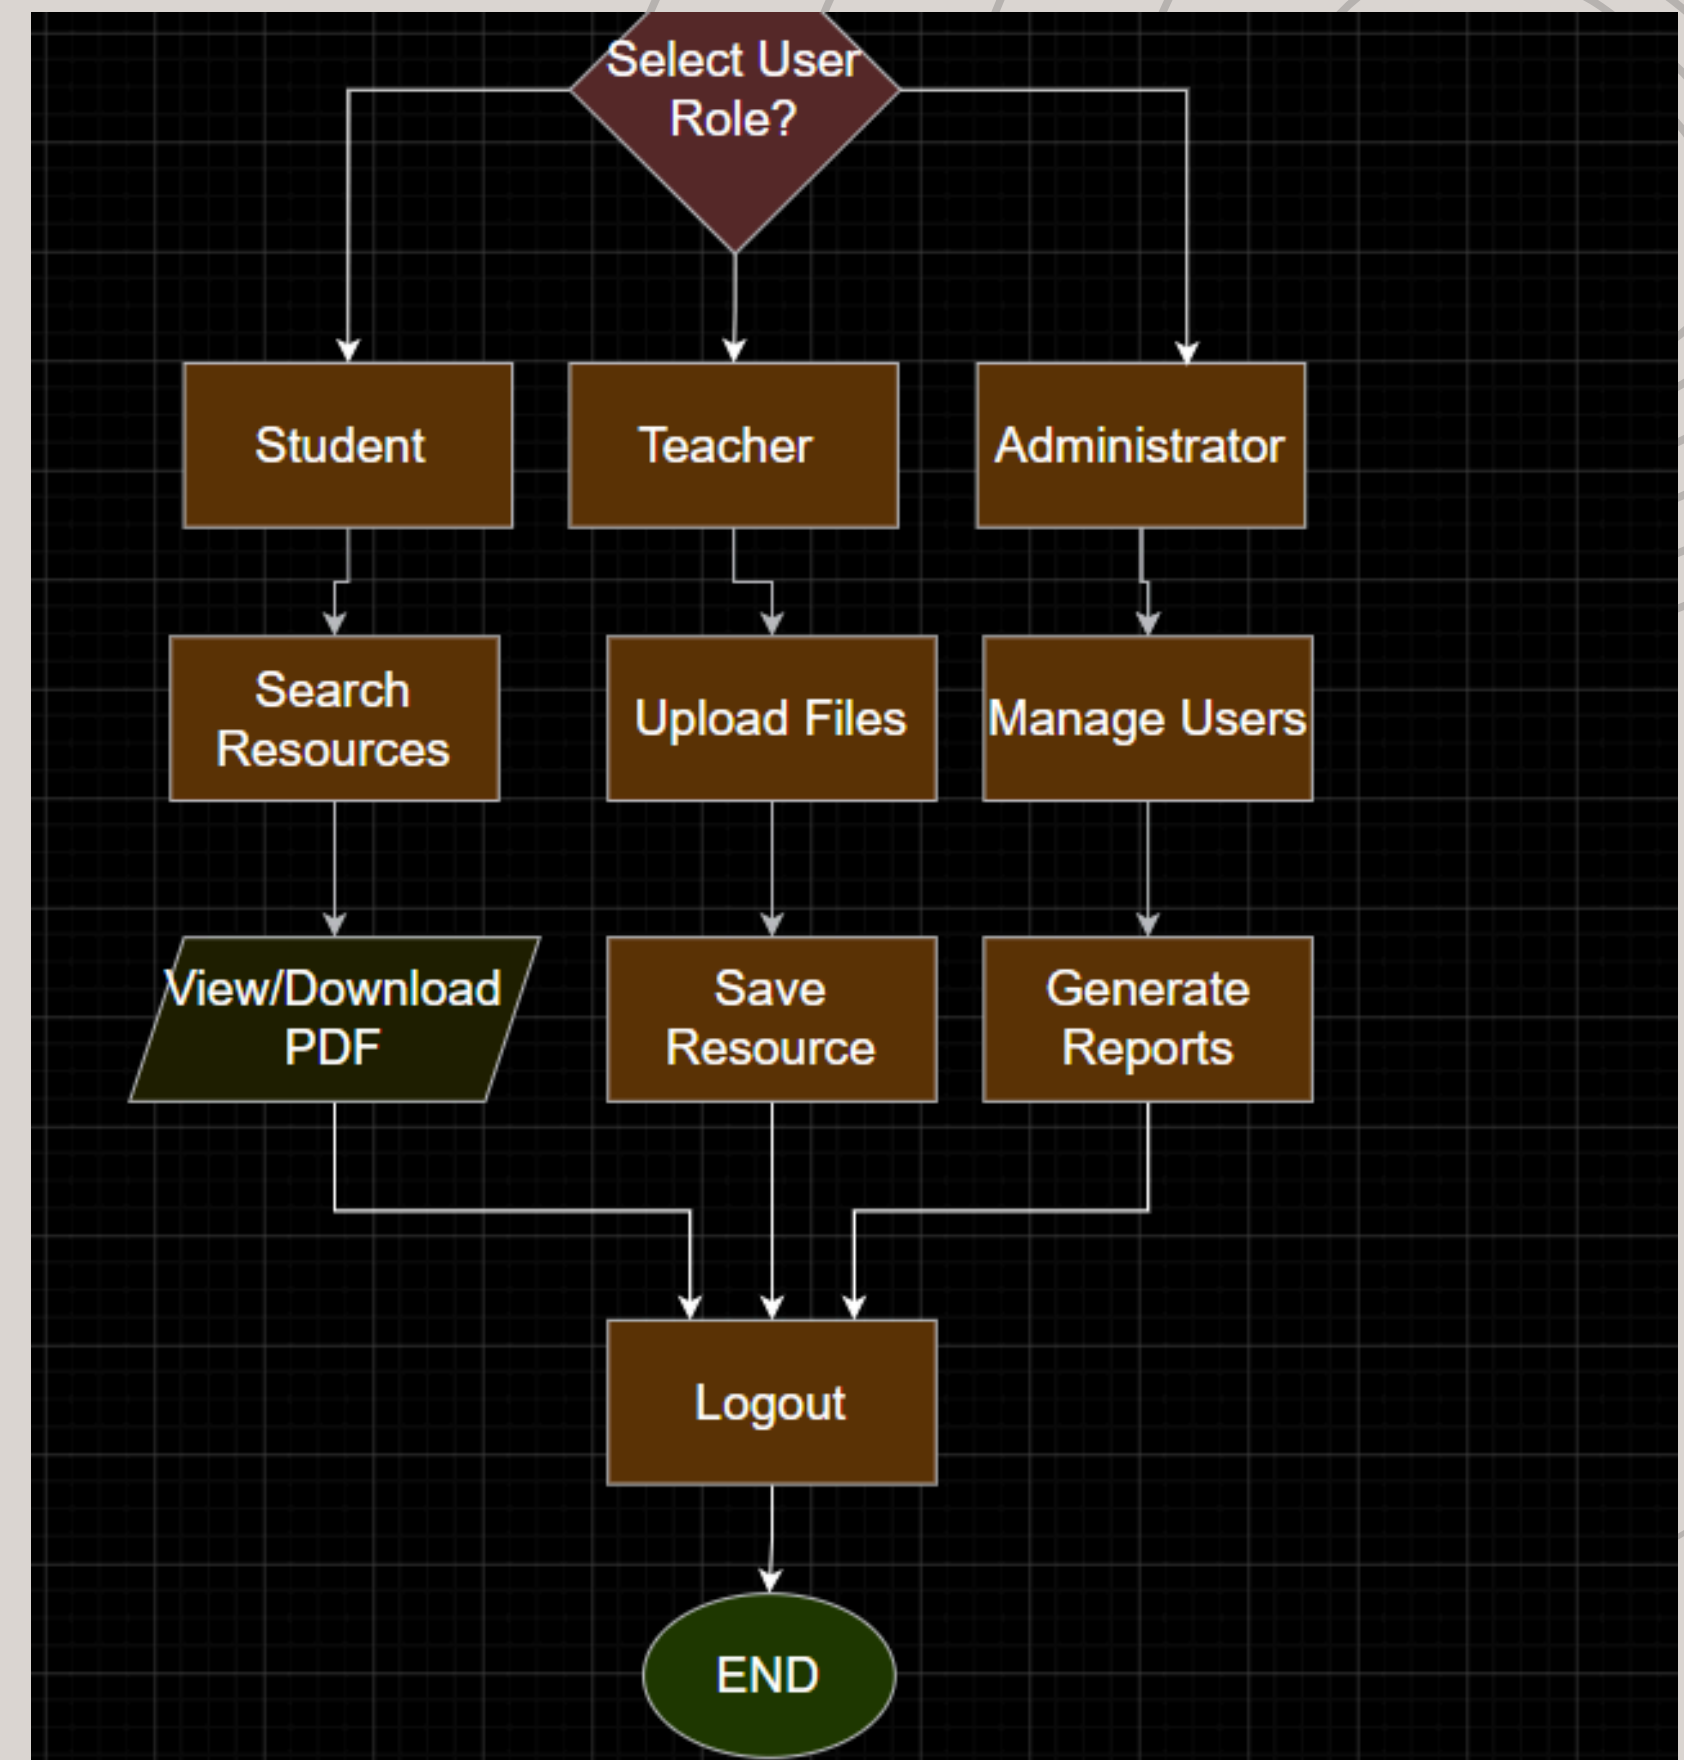

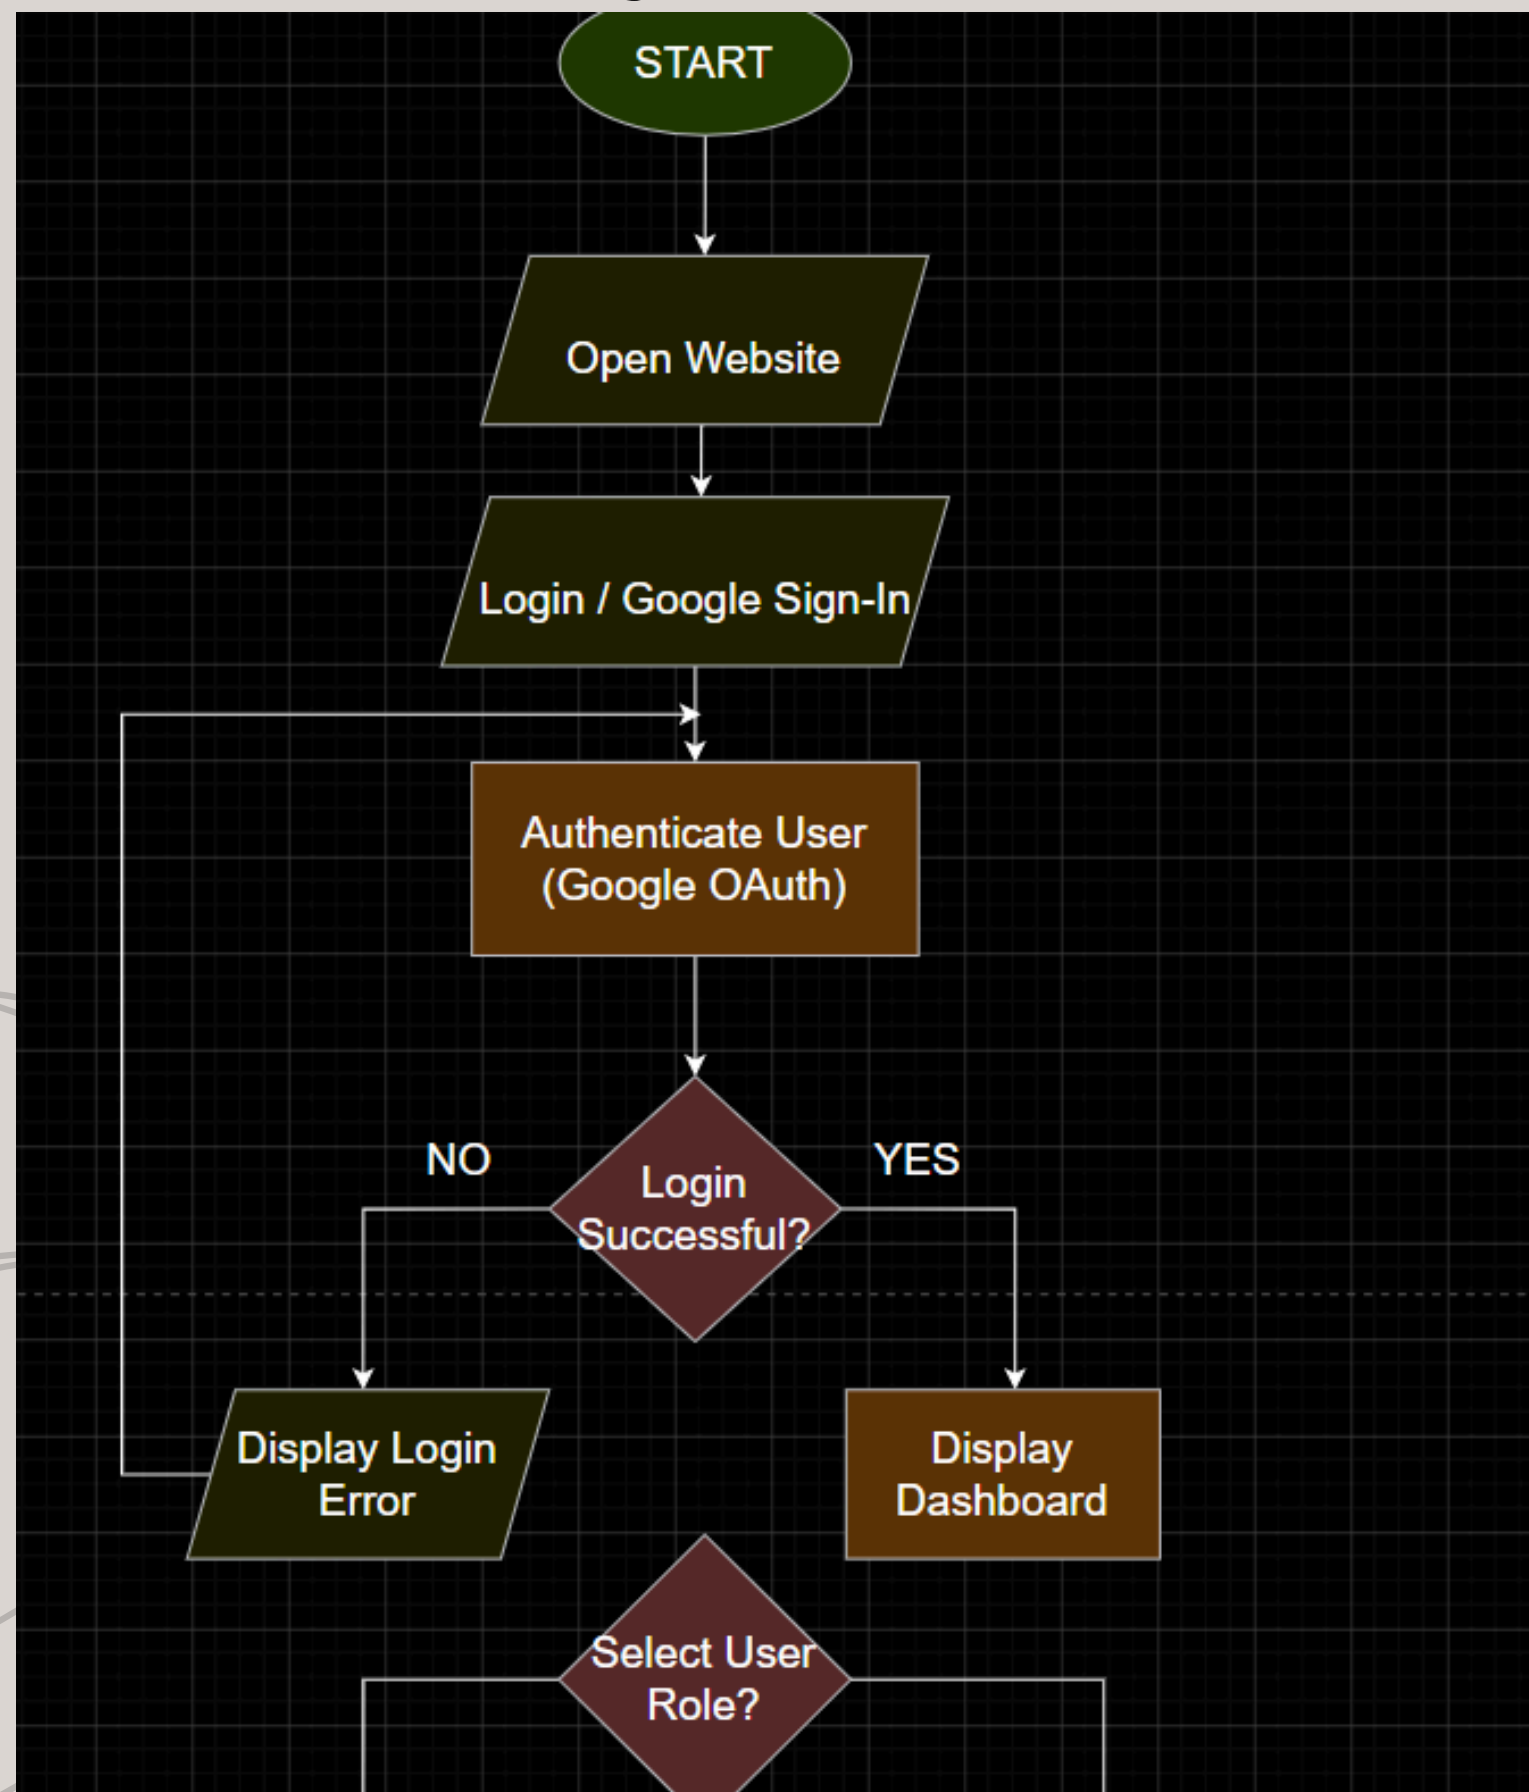

Teacher

- Upload files
- Edit resources
- Manage materials

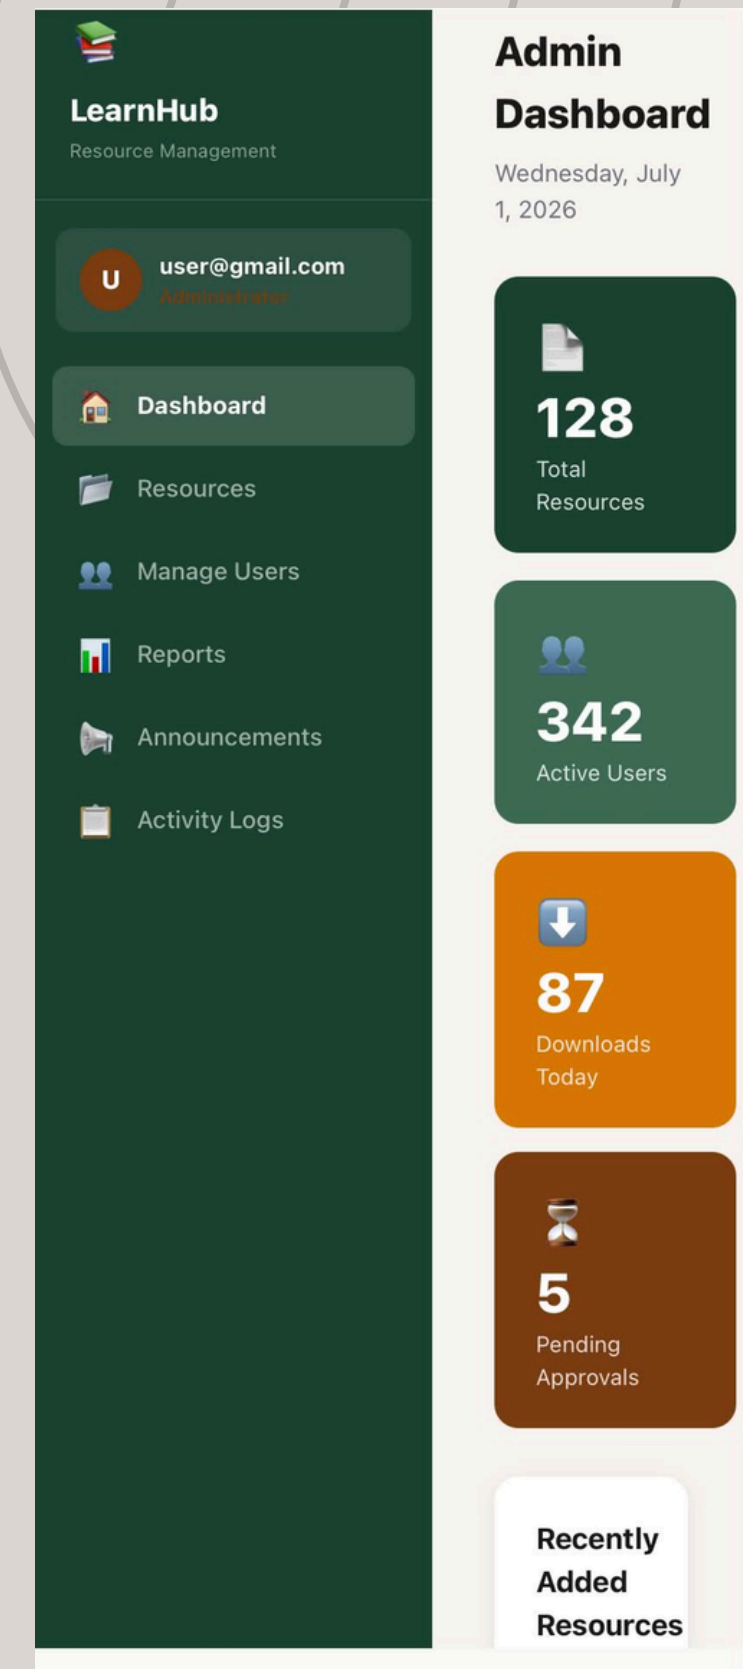

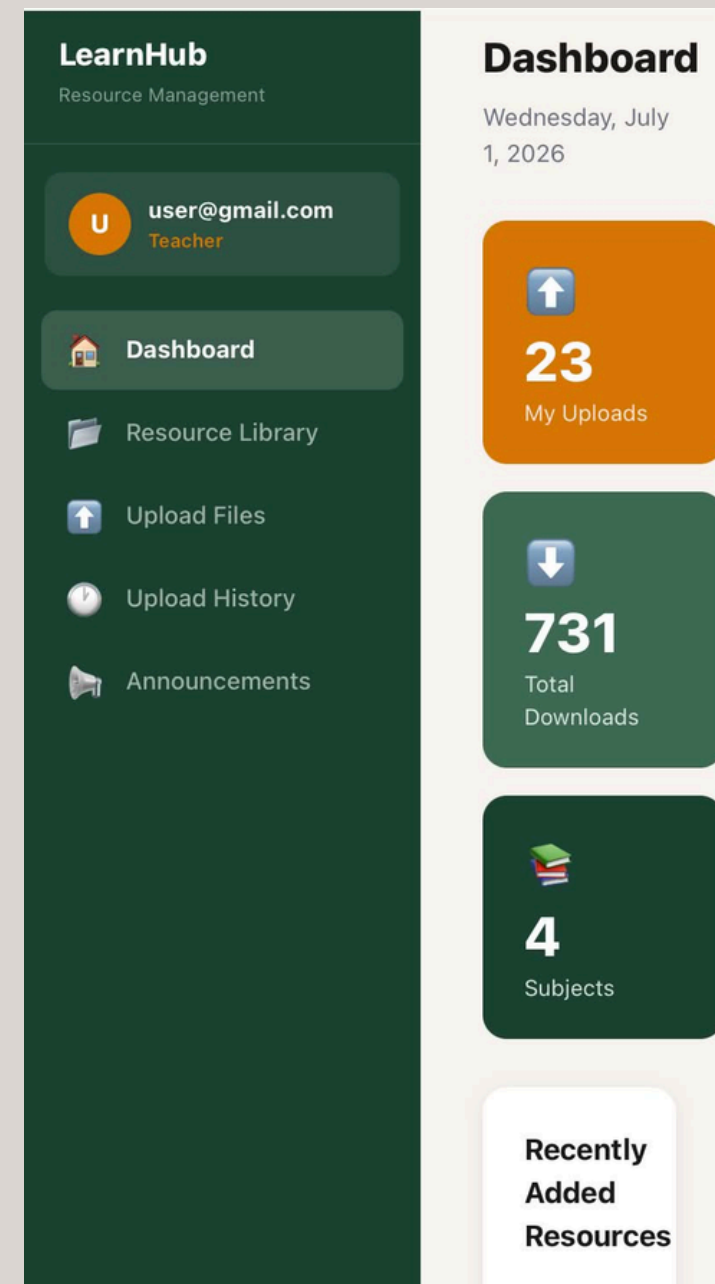

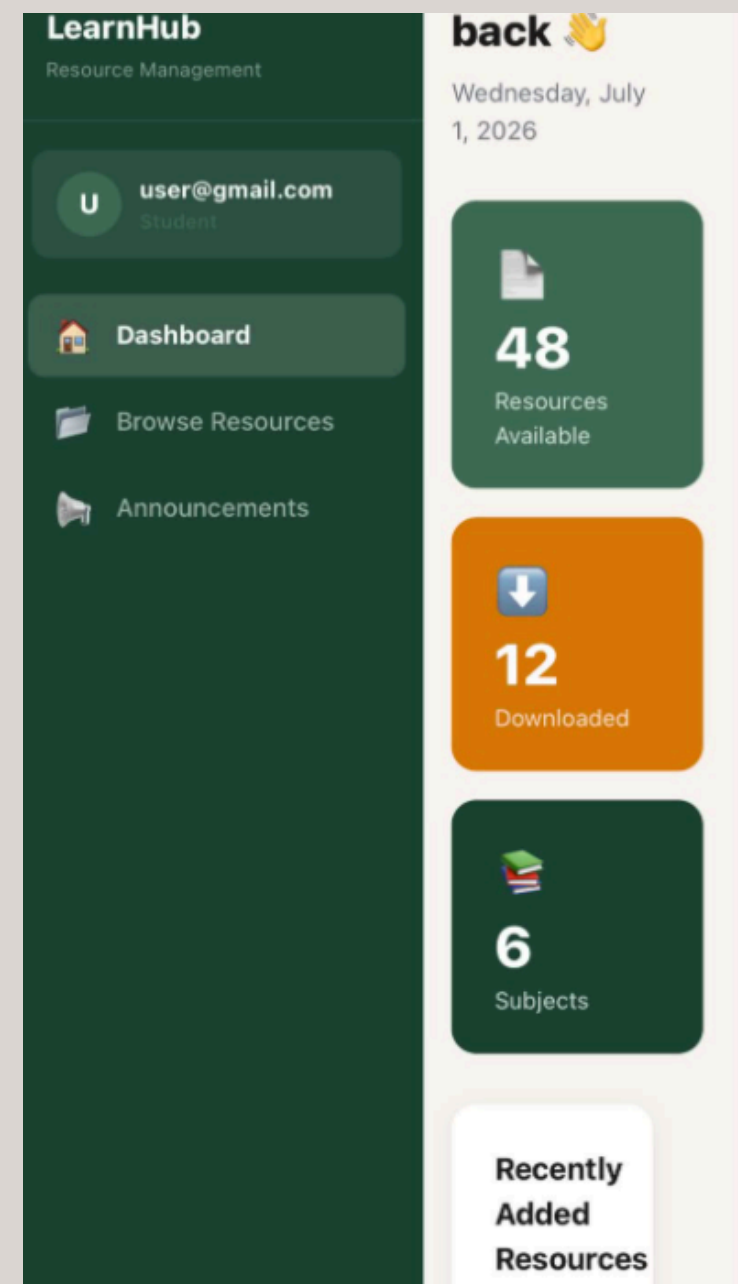

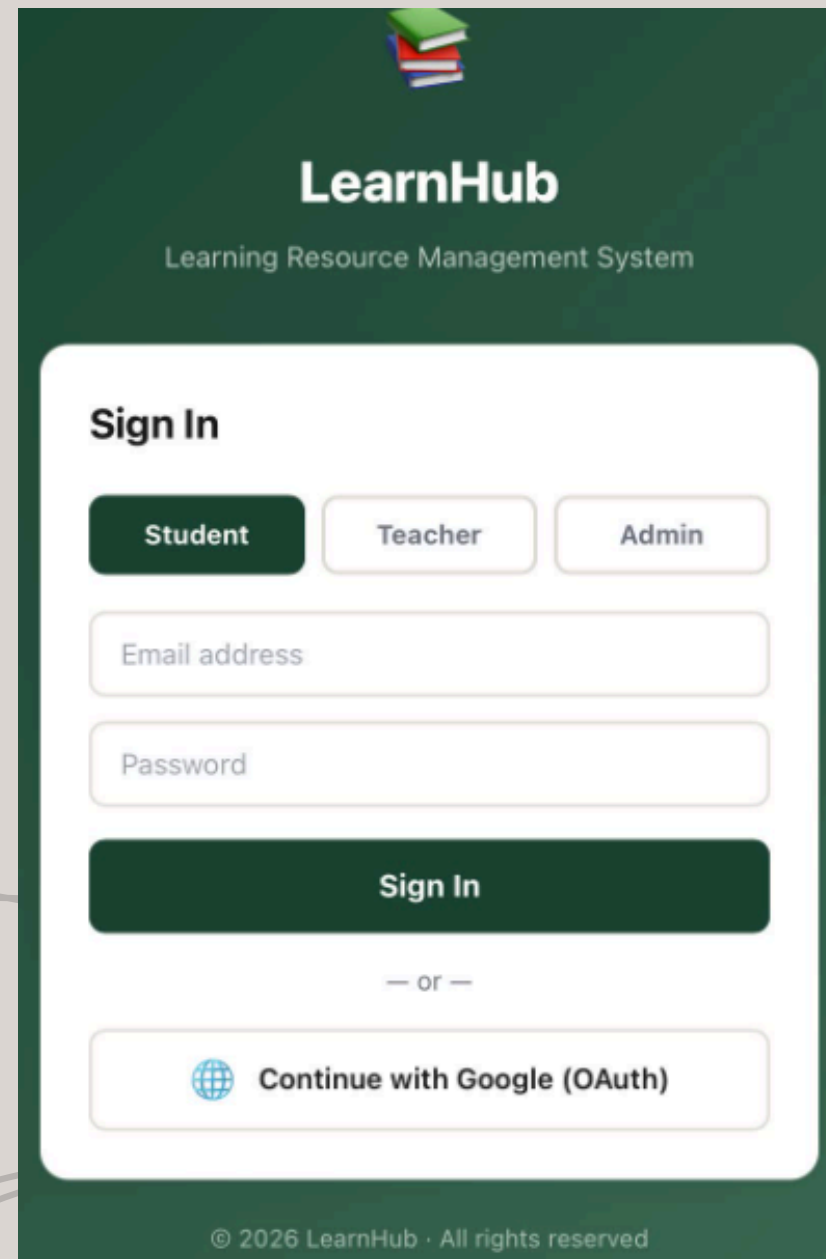

Student

- Login
- Search files
- Download learning resources

System Work Flow

System Features

System Features

Student	Teacher	Administrator
 Secure Login	 Secure Login	 Dashboard
 Dashboard	 Dashboard	 Manage Users
 Search Learning Resources	 Upload Learning Resources	 Manage Subjects & Courses
 Browse by Category	 Edit Resource Information	 Approve or Archive Resources
 View Resources	 Delete or Archive Resources	 Generate Reports
 Download Resources	 Organize by Subject/Course	 Manage Announcements
 View Announcements	 Manage Announcements	 Activity Logs

Scope and Limitations

Scope

- Learning resource management
- Upload/download files
- User management
- Reports
- Mobile-friendly website

Limitations

- No online examinations
- No grading system
- No live video classes
- Internet connection required

Significance of the Study

Students

- Easy access to learning materials
- Saves time
- Available anytime

Teachers

- Organized resources
- Less repetitive work

School

- Centralized repository
- Improved learning support

System Maintenance

Who will maintain the system?

- School IT Personnel or System Administrator

Maintenance Activities

- Fix system errors (bugs)
- Update the system when needed
- Back up the database regularly
- Monitor system security
- Manage user accounts
- Improve system performance

**Thank
You**
